## EDUCATION

### University of Massachusetts Dartmouth

MA, US

College of Engineering, ABET Accredited

September 2021 - Present

Ph.D. in Engineering and Applied Science (Computer Science and Information Systems)

- Courses Taken: Advanced Engineering Mathematics, Artificial Intelligence, and Advanced Computer Systems
- Grade Point Average: 4.0/4.0
- Research Interest: Secure Software Design and Side-channel attacks

### University of Massachusetts Dartmouth

MA, US

College of Engineering, ABET Accredited

September 2019 - Present

M.S. (Master of Science) in Computer and Information Science

- Courses Taken: Algorithms and Complexity, Advanced Data Mining, Advanced Machine Learning, Database Design
- Grade Point Average: 3.74/4.0

### Bells University of Technology

Ota, Nigeria

College of Natural and Applied Sciences

November 2013 - May 2017

B.Tech. (Bachelor of Technology) in Computer Science and Information Technology

## PROFESSIONAL EXPERIENCE

### College of Engineering - UMass Dartmouth

September 2021 - Present

Graduate Research Assistant

- Currently performing research on fuzzing using reinforcement learning
- Performed research on security exploits that originate from vulnerability in speculative execution inherent in modern-day microprocessors

### NSA/DHS Center of Academic Excellence in Cyber Defense Research (CAE-R)

May - September 2021

Graduate Research Fellow and Mentor

- Conducted research on software performance and reliability with Dr. Gokhan Kul and Dr. Lance Fiondella
- Mentored two undergraduate students towards the completion of their Research Experience for Undergraduates (REU) program

### CIS Dept. - UMass Dartmouth

September 2020 - May 2021

Graduate Research Assistant

- Research assistant for Dr. Gokhan Kul (Interest: Cybersecurity and Database Systems)
- Developed an Automated User Experience Testing System methodology through multi-dimensional performance impact analysis

### NSA/DHS Center of Academic Excellence in Cyber Defense - UMass Dartmouth

September 2020 - Present

Graduate Fellow

- Fellow at the NSA/DHS Center of Academic Excellence in Cyber Defense at the UMass Dartmouth under the supervision of Dr. Lance Fiondella

### CIS Dept. - UMass Dartmouth

September - December 2019

Graduate Student Grader

- Former grader for the undergraduate course: *Software Process and Project Management*
- Graded assignments, projects, and exams

### CIS Dept. - UMass Dartmouth

August 2019

iOS Camp Instructor

- Worked as an instructor at the UMass Dartmouth iOS Mobile App Development Camp under the supervision of Dr. Raymond N. Laoulache
- The team taught campers programming, problem-solving and iOS mobile app development using the Swift 5 programming language

### Amuwo-Odofin Secondary School

Port Harcourt, Nigeria

Information Technology Teacher - NYSC

May 2017 - April 2018

- Worked as an Information Technology teacher at Amuwo-Odofin IT Department
- Taught Information Technology to 9th-grade students

### Nigerian National Petroleum Corporation

Port Harcourt, Nigeria

Software Engineering Intern

May - August 2015

- Worked as a software engineer at the NNPC/PPMC ETSD Department
- Developed webpages for the engineering section of the company
- Updated the software of over 100 desktop computers and laptops in the refinery

## PUBLICATION

- Chidera Biringa, Gokhan Kul. 2021. Automated User Experience Testing through Multi-Dimensional Performance Impact Analysis. In *Proceedings of the ACM/IEEE 2nd International Conference on Automation of Software Test*

## TECHNICAL SKILL

---

Programming Languages	C, C++, Java, Python, R, SQL, HTML/CSS, JavaScript
Databases	MySQL, NoSQL
Libraries, Packages	Pytorch, Scikit-Learn, Caret, OpenCV, Pandas, Bootstrap, Quanteda, Tidyverse, Git
Software	GitHub, VSCode, MS Office, $\LaTeX$ , Power Bi, Tableau, Godot, Travis CI
Programming Paradigms and others:	OOP, FP, PP, IP, Agile Development, MVC, UML, Unit Testing, Integration Testing

## TECHNICAL EXPERIENCE

---

**SpecDet | A Multi-ML System Capable of Detecting Spectre Attacks in Two Stages** September 2021 - Present

- Developed a bipartite detection system that employs both CPU processes state and Spectre-V1 gadgets to detect spectre attacks
- Investigated security exploits that originate from speculative execution component of processors

**iFuzz | Intelligent Fuzzing using Deep-Reinforcement Learning** September 2021 - Present

- Currently researching on a reinforcement learning technique to intelligently addresses security vulnerabilities that result in software crashes
- The present use-case is in the area *Fuzzing*

**SEF | Source Code Evaluation Framework** August 2021 - September 2021

- Developed a source-code based evaluation framework for software performance learning
- SEF provides a zero upfront effort performance estimation method and presents the evaluation of the automated QoE testing method

**MPSS** June 2021 - September 2021

- Developed a Jenkins plugin for continuous code monitoring and code impact estimations
- MPSS automatically hooks Java-based software projects on GitHub and continuously monitors repository code update to provide feedback to developers on the impact of those updates

**Master's Thesis | Multi-Dimensional Performance Impact Analysis of Security Updates in Software Development Lifecycle** September 2020 - March 2021

- Developed a novel automated user experience testing methodology
- Built a pipeline of regression models capable of learning how code changes impact the test time unit of a software
- Created a robust code stylometry feature set using layout, lexical and syntactic features
- Created a benchmark dataset to enable experiments in software engineering research

**Neural Network Model | Predictive Frame Inference (PIF) Model** April - May 2020

- Built an encoder-decoder convolutional neural network that can interpolate in-between frames of a given video thus increasing the frame rate
- A high definition 25 fps video was increased to 50 fps without loss in resolution, reduced length of the video, or noticeable distortions

**Database System | SQL Query Evaluator** February - April 2020

- Built an SQL query evaluator for a single-threaded database that can run TPC-H queries
- Implemented support for Select, Project, Cross Product, Union, and Aggregate operations
- Implemented standard optimization techniques like projection pushdown, selection pushdown & cross product to join conversion

**Classification Model | Authorship Attribution** November - December 2019

- Built a random forest classification model that predicts Victorian Era Authors based on their authored novels
- Sentiment features were extracted and used as features in the model

## CIVIC ENGAGEMENT EXPERIENCE

---

**Startup Weekend - UMass Dartmouth** February 2021

Technical Mentor

- Volunteered to help participants with technical problems
- Dedicated 8+ hours to assist participants
