EDUCATION

University of Massachusetts Dartmouth

Dartmouth, MA

College of Engineering, ABET Accredited

Master of Science in Computer Science (Expected December 2020)

January, 2019 - Present

• Courses Taken: Advanced Data Mining; Advanced Machine Learning; Database Design

• Grade Point Average: 3.7/4.0

Bells University of Technology

Ota, Nigeria

College of Natural and Applied Sciences

November, 2013 - May, 2017

Bachelor of Technology in Computer Science

• Courses Taken: Algorithms and Data Structures; Object-Oriented Programming; Operating Systems

RELEVANT SKILLS

- Proficient in object-oriented programming languages.
- · Proficient in building machine learning models with Python and R using Pytorch, Tensorflow and Caret libraries.
- Proficient in full-stack web development with HTML5, CSS3, Javascript, Python and SQL using Bootstrap, React, Heroku and MySQL.
- · Knowledgeable with Dart using Flutter framework to build natively compiled IOS and Android mobile applications.
- Proficient in basic Linux/UNIX commands to create and process files and processes.
- · Solid ability to solve problems by designing and implementing programs.

TECHNICAL SKILLS.

Java; Python; Dart; R; SQL; Swift; JavaScript Programming Languages:

Frameworks/Libraries and Platforms: React.js; Flutter; Pytorch; Quanteda; Caret; Scikit-Learn; Tensorflow; Tidyverse; Git/Github

PROJECTS.

Hoard (1 - person project)

• Built a RESTFUL API with full CRUD functionalities to keep track of my part-time bibliophilic sessions.

June, 2020

• Built using Python, Flask, SQLite, and SQLAlchemy.

Lines (1 - person project)

• Built a personal portfolio website to showcase some of my work.

April, 2020

• Built using HTML5, CSS3 and Vanilla Javascript.

SQL Query Evaluator (5 - person project)

• Built an SQL query evaluator for a single-threaded database that can run TPC-H queries.

February - April, 2020

• Built using Java, CCJSqlParser and evallib libraries.

Implemented support for Select, Project, Join, Union and Aggregate operations.

Predictive Frame Inference (PIF) Model (3 - person project)

• Built a Predictive Inference Model (PIF) model for video prediction.

April - May, 2020

• The model can generate in between frames of a video thus increasing the frame rate.

· Built using Python, PyTorch and numpy libraries.

Authorship Attribution Model (1 - person project)

• Built a classification model that predicts Victorian Era Authors based on their authored novels.

November - December, 2019

• Critical predictors of the model were derived from sentiment analysis.

• Built using R, quanteda, caret, and tidyverse libraries.

Customer Response Chatbot (1 - person project)

• Built an Artificial Intelligence-powered customer response chatbot. • The model was able to predict 3 correct responses from 5 sequential questions.

December, 2019

September, 2019

• Built using R, quanteda and stringi libraries.

WORK EXPERIENCE

UMass Dartmouth MA, US

Grader September - December, 2019

• Graded assignments, projects and exams for a course on Software Process and Project Management.

UMass Dartmouth MA, US

• Taught computer programming using Swift programming language.

Amuwo-Odofin Secondary School

Teacher

Teaching Assistant

• Taught Information Technology and Mathematics to 9th and 12th grade students respectively.

May 2017 - April, 2018

Nigerian National Petroleum Corporation

Software Engineering Intern

Port Harcourt, Nigeria May - August, 2015

Port Harcourt, Nigeria

• Developed webpages for the engineering section of the company.

• Designed strategies to improve the performance of in-house crude oil processing software.
